(NICAGO, Jun. 23.—A young man, whose real name is (nto Funk, was arrested last night, having in his possession a large number of books, stolen from the public library. The books were seized at his residence and were found to be in slarge boxes. These boxes were removed to the new city hall builting to-day, when the discovery was made that among them were six or eight infernal machines, containing dynamite, any one of which was sufficient to blow up such a building. Consternation reigned at police headquarters when it e discovery was made and a number of startling rimnors were at once put affont. Funk, when questioned, said he was only experimenting. The matter is still a mystery.

The box found among the stolen books was a foot long and six inches deep. Insice it was a foot long and six inches deep. Insice it was a lot of a saydust, parked about a revolver. The sawdust was saturated with giverine. A little crank, made of thicr wire, was nitached to the outside of the box. Still another box was found about twice the size of the one deer, bed, filled with 2 dozen packages of dynamite. Funk has been known as J. C. Talbert, and was a student at the Chicago me head college, and contends that he was experimenting for scientific purposes only. Defectives, however, are divided in their views, and contend that he intended to commit suitable by this method, if arrested. A statement was also made that he was an active socialist, but this was denied. The statement is made by the police that if the machine that exploded it would have certainly destroyed the city ball building and occasioned frightful less of life.

Sun Francisco, Jun. 21.—The Transcontinental Association closed is labros yesterday, the last day being occupied in forming new articles of agreement, in accordance with the club ages agreed to. The new articles were not sign of by all the lines interested, the objectors being the Atlantic and Paris ic militroad and the oregon lathway and Marigation Company. As already, sated, norther a lines are paid a percent, of San Francisco beiness, to keep out of California and the southern lines are paid a percent, of Portland business for keeping out of Oregon, Under this division of territory the Gregon limits and Marigation Company claims on account of its steamach bline between San Francisco and Portland, that it is not only a part of a though line from the east, via Portland in San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco, but part of a through line via San Francisco to Portland, and demands that southern lineas rall allow the O. R. & N. Co., a percentage of the San Francisco to Portland. This the southern lines have so far declined to concede. The matter is to be submitted to the executive committee of the association, and unless allowed the O. R. & Co., will probably give the pinety days notice.

### THE SHABON DITORCE CASE.

THE SHARON DIVORCE CASE.

The Tyler-Gumpel Contract, the Cause of a Great Peal of Qubit line.

SAN FRANCISCO, Jan. 23.—The Sharon divorce case, and matters incidental to it, are the subject of much talk this neurning. This is in a great measure due to the amounteement of the new affidarits to be read in Judge Sullivan's court to-morrow morning, and which are said to be of an extraordinary character. Strong efforts are being made by the Tyler side to have the affidavit of Captain Lees, chief of the detective police, suppressed. The Barnes side insist on its being presented, as it will, as alleged, throw new light on the Tyle Gumpel contract, for which \$25,000 was paid. This contract, how it was obtained by Molaugh in, clerk for Tyler, and whether it is a genuine document or not, constitute the chief teature of Lees' affidavit. EVANS' ARGUMENT.

EVANS' ARGUEETT.

EVANS, one of the afforcess on the Sharon side, stated to Judge Sullivar, in chambers, that there were strong and good reasons why the affidavit should be presented and read. Evans argued as follows: "Mr. Tyler claims that Mo-Langhin was acting under its instructions, and that he made that contract is a genuine paper, and is what McLaughin represented it to be, and I hope we shall be able to develop circumstances which will demonstrate that it was so; and that, so far from being sought out by General Barnes, McLaughin sought Mr. Barnes and Cappain Lees, showed Lees this paper, and in the course of the negotiations, in order to give Lees confidence to him, he went out of his way to say: "To convince you that I am acting in perfect faith in this mater, and that this paper is what I represent it to be, I tell you now that I am not afraid of Tyler. I have got him in my power. A crime has been committed in his office, of which have knowledge.' And If we can go on to show that the orime was committed, this is a circumstance to show that McLaughin was clealing with Lees and Barnes, not in confidential relations with Tyler it all, out entirely on his own account and in host it to Tyler. If he had been active as Tyler's decoy, and assisted by Tyler, by no human possibility could he have given this information. We think this is a vention of the proposite of the proposit

his own account and in host ity to Tyler. If he had been active as Tyler's ideeoy, and assisted by Tyler, by the human possibility could be have given this information. We think this is a potential chromation. We think this is a potential chromation. We think this is a potential chromation. We think this is a potential chromation, to show that if Mo-Laughlir did disclose a crine in Tyler's office, by no inman reason could it be said that he was acting for Tyler. We say that the Gumpel continued, say in the first that been offered to me I would have been the door of a house if were told that behind there have the dead hady of a murdered man, although I had nothing to do with this transaction?

Evans continued, saying if at the existence of the Tyler-(numpel contract was known a long time agolto a member of the bar of this city, but declined to state his name.

The matter stated that he had heard of the Tyler-(numpel contract and that the information came to him through by Mi Seaton, a lawyer of this city, who had learned a that the information came to him through by Mi Seaton, a lawyer of this city, who had learned a three trom Mc-Laughin.

Mi. Seaton was interviewe, and acknowledged his knowledge of the existence of the contract, and explained it he was, it which McLaughlin had told him of it. WASHINGTON, D. C., Jan. 12, 1885.
Senator Dolph's bill amending the timber land act was to-day reported favorably from the committee on public lands. The measure is one of great importance to Oregon and Washington territory, and there is every promise that it will soon become a law. In reporting the bill back Mr. Dolph said:

"The act of June 3, 1872 for the solution."

"The act of June 3, 1878, for the sale of timber lands in the states of California, Oregon and Nevada, and in Weshington territory was intended to authorize the sale of lands chiefly valuable for timber for commercial purposes. In the first section of the act the words and not fit for agriculture" occur. They were evidently put in the law for the purpose of excluding from the operation of the act innds which, although imbered lands, are of such a character as to be suitable for homesteads, and which may be profitably cleared and cultivated. The secretary of the interior has construed the law to mean that, if the lands when cleared of the standing timber and stomps would be at for cultivation, they cannot be purchased under the act, and has suspended all entries of such lands. The result is that the law under this construction, its nucleus and fails to accomplish. All the lands western Oregon and in western Oregon and in western Oregon which valuable timber grows is good land and will, when cleared, if it ever is, of the timber and stumps, besultable for agriculture. The natural wealth of western Oregon and Washington is largely in timber, and the finder will never the extensively cut down and burned to clear the land for agricultural purposes. In most cases the man who takes a homestead or pre-emption claim upon such lands hitends to secure his tile for the timber by an evasion of the law so far as cultivation is concerned. The settler who would make the necessary bone take improvement upon a quarter section of this improvement upon a quarter section of this improvement upon a quarter section of the country. The cost of clearing such land is at least \$100 per acre, besides which he clearing would epidanger the valentla timber upon public and private lands by the liability of the spread ruling of the burner is removed. ### IN IMPORTANT MATTLE

From the character of the le ters of inquiry received daily at this office, and, the London sale of the New Year edition of "HE OREGO-IAN to those who "in that way answer inquiry about Oregon", from the tenor of letters received by state, county and city officials and prominent citizens generally, and especially those going into the hards of the secretary of the Oregon imagration board, it is very eyrd-not that this state is attracting unusual attention as an objective point for the farming class of immigrants and new comers from the older states. The case of martine frences which have been and now are pending before the court like term is in great excess of any former time, and shows that matrimonial felicity is gelting as scarce that there infrienced for our cound? As it costs something to get a divorce howadrys, for fawyers must live and live well, too, it would pay young lovers and old ones dilevies, to get a good stock of felicity on hand before they take of a literate to matry.

NEWS FROM CATTLE RANGES. A subscriber of THE OREGONIAN at Albany writes, giving news from castern and southern Oregon cattle

TRAM DROWNELL—A singular accident occurred about 1 occock yesterday afternoon at the East side pontoon of the O. & C. ferry. After one of the tracks of the Oregon Transfer company had taken a load the team was driven flown the ferry incline about midway, where they were stopped by the driver, who went hack to assist another driver with his team. I buring his absence from the team they compenced a slow walk toward the river, and very soon, the brake for some reason not serving its purpose, the mot enture caused by the heavy load proved too powerful for the horses to check, and they went with a run down the incline and halfway into the river, and were drowned. The near horse appeared to realize the danger and attempted to turn off open approaching the river, but his companion falled to follow suit. The forc whools of the truck went over the edge of the pontoon, but were prevented from going diverboard by the bed catching on the edge. The taujum naturally dropped down, fulling the horses' heads into the water and holding them there, while their legs lay upon the pontoon. In this position they were drowned. The harness was cut away and the animals drifted down stream. They were valued at \$500.

THE CASI O.—It has been temporal more than once that the Casino is a little too farge a building for Portland with its present, population. The production of "Prince Methuralem," this week, has demonstrated that the setting capacity is a "rife too small. Or course the spern opened to the usual packed house. The second evening showed no perceptible falling of a altendance, aird last night the crowd was larger than the opening night. It is hardly necessary to say in the face of this verdict that "Prince Methusalem" is a great success. There is no question the bit is the most popular of a lithe operas produced at the Casino, and ne wonder. It sparkles from beginning to old with brilliant features, and there is never a dull spot. Thus who want reserved sears for next week will do well to secure them soon.
